

Qualification scholarship for (prospective) master's students within the Cluster of Excellence „CUI: Advanced Imaging of Matter”

Scholarship programme

The education and promotion of young researchers is a key aspect and ingredient for the successful operation of the cluster. By receiving the scholarship, students are granted the chance to participate in research initiatives within the Cluster of Excellence “CUI: Advanced Imaging of Matter”. You can anticipate enjoying **exceptional research environments**, explore a **broad range of subjects** and become part of an **inspiring community**. This experience will establish an ideal groundwork for your future scientific and **career advancement**. Following completion of your master's degree and the stipend, you will have strong connections with the working groups within the cluster, increasing your chances of securing a **PhD position**.

Supporting programme

- **Onboarding Event:** get-to-know the cluster research, infrastructure, student representatives & office
- **Opportunity to participate in CUI [Summer School](#)** / Annual Meeting: offsite events for scientific exchange, poster talks and lectures among the researchers of the cluster
- **Courses:** opportunity to participate in CUI colloquiums, soft skill and science workshops
- **Visit research facilities** of Hamburg institutes (e.g. XFEL, DESY, MPSD)
- **Social Events:** peer meetings/lunches with CUI student representatives, regular invitation to H-BAR event

Financial support

- **Funding of €934** per month for a duration of 12 months
- **Travel cost** for one conference

We are very pleased to build and strengthen the young community of the cluster and are always open to ideas and enquiries!
